The Scholarship Project: Bibliography

The bibliography is divided into three sections: College Higher Education in general; scholarship and the research-teaching nexus; the nature of vocational/technical/professional knowledge. This is for ease of navigation around the literature, and is not intended to mark clear disciplinary boundaries.

N.B: Some links may not work by clicking on them. Please copy the entire URL into your web browser to access the journal.

College Higher Education in general:

of higher education in further education colleges*. London: Learning and Skills
